DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of species III in the reply filed on 11/06/2009 is acknowledged. The traversal is on the ground(s) that the current application is filed as a U.S. national stage application under 35 U.S.C. § 371 and the restriction of the last Office action is not proper. This is found persuasive. **The restriction requirement as set forth in the Office action mailed on 10/06/2009 is hereby withdrawn.** A new restriction requirement under 35 U.S.C. § 371 is provided.

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I, depicted in Figs. 1-3;

Species II, depicted in Fig. 4;

Species III, depicted in Fig. 5;

Species IV, depicted in Figs. 6-11;

Species V, depicted in Figs. 12-14.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. The claims are deemed to correspond to the species listed above in the following manner:

claim 4 is readable on species I; claims 10-11 are readable on species II and III; claims 12 and 13 are readable on species III; claims 14-15 are readable on species IV; claims 16 and 17 are readable on species I and V; and claims 18-19 are readable on species V.

The following claim(s) are generic: claims 1-3 and 5-9.

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the special technical feature of each species is the specific structure (as depicted in the drawings) and the specific structure of each species is exclusive to that species (i.e. the stepped shaped occlusion element of Species I is not found in Species II, III, IV and V; the flange of detection tube of species II is not found in species I, III, IV and V).
